

# Excursions Religious Heritage in the Netherlands

monumental churches and their treasures

The Netherlands have a tremendous variety of wonderful and impressive monumental churches.

Art+context wants to draw attention to the importance of the preservation of endangered religious heritage and therefore organizes excursions to monumental churches.

Lectures are given on site. Experts will inform you about the characteristics of church architecture, the precious interiors and the art objects: silverware, organs, mausoleums, funeral signs and stained glass windows.

Special attention is paid to preservation, restoration, use, extended use and transformation of churches.

The excursions offer a fascinating look at the historical context in which the Dutch built churches in their merchant cities, villages and breathtaking countryside.

Come and visit them!
