

# The transnational route Way of Cistercians paving the way for the sustainable local development

We are

the **Slovene Museum of Christianity**, a national museum that preserves, exhibits and interprets movable sacral heritage. We also present the history of the ancient complex of Cistercian Abbey of Stična as well as the community of the Cistercians who live here today.

## Ancient Cultural Landscape

Together with 17 other partners, monumental Cistercian monasteries from Slovenia, Germany, Austria, Poland and the Czech Republic, we joined the project **Cisterscapes** - Cistercian Landscapes Connecting Europe in 2019.

Together we have created a transnational hiking route '**Way of Cistercians**' that takes the visitor through the ancient cultural landscape where traces of Cistercians are still today noticeable. With careful choice of interpretation tools, that do not impose, pollute or damage the ancient landscape we are creating the sustainable tourism solutions that fit the local community.
